

## Powerlight HID Metal Halide Rechargeable Flashlights

Part #: PL-24

These HID Metal Halide flashlights are controlled by electronic ballast, powered by a rechargeable lithium ion battery. The battery is good for over 500+ charges and the lamp is rated for 2000+ hours. The 24W, PL24 produces 1300± lumens. The 24W is 16 inches long and the lens is 3.25 inches in diameter.

### **3 Month Lead Time on the PL-24 and/or PL-24 accessories.**

The PL24, 24W Power Light™ comes with nylon carry bag & strap, 100/240VAC charger, with overcharge protection, LED indicator, rubber lens & end caps, (to help with shock absorption), back up battery charger stand, strap mounts, & rubber non-slip grip handle. Warranty is one (1) year to original retail customer, (proof of purchase and registration required), on the lamp, ballast, battery & switch module, and lifetime warranty on the light body.

Additional accessories include: 12/24VDC fast charger for auto, boat or plane, amber lens (for better smoke, fog, and dust penetration).

Rechargeable lithium ion battery. Instant on and hot restrike. Black hard-anodized aluminum; corrosion and wear resistant. 1.5 our burn time. Hardened and heat treated front lens. Pre-focused spot beam. Charge plug conveniently located in end cap. 2.5 inch polished and coated reflector for maximum beam range.

24W HID Powerlight Rechargeable 12/24 Volt Flashlight with Lithium Ion Battery Pack produces 1300+ lumens. Click here for specifications on PL24 24W Rechargeable HID Flashlight. Comes with rapid charger, nylon carrying bag, shoulder strap, backup battery charger stand (backup battery not included)

24 watt rechargeable 12/24 volt high intensity discharge metal halide (HID) lamp.

- Burn time is 1.5 hours on a full charge
- HID lamp 5 times more efficient than filament and puts out 1300 lumens of 6000k bright white light
- Projects light to 3000 feet
- Lamp life in excess of 2000 hours
- HID lamp is controlled by electronic ballast powered by rechargeable lithium ion battery
- Rechargeable lithium ion battery is good for over 500 charges and holds a charge longer than alkaline or metal hydride batteries

- Charge time is around 2 hours to full charge
- HID lamps do not have a filament so they are more rugged and less sensitive to jarring
- Ships with 100-240V AC 50/60 Hz fast charger with over-charge protection and charge indicator LED
- Optional 12/24V DC charger available
- Twist on/off switch
- End cap houses charger input plug for easy access
- Rubber end cap aids in shock absorption
